SUMMARY

Motivated B.Tech Computer Science and Engineering student with a strong foundation in Java, Python, C/C++, Artificial Intelligence, and full-stack web development (HTML, CSS, JavaScript). Skilled in object-oriented programming, data structures and algorithms, machine learning fundamentals, REST APIs, and database management (MySQL, MongoDB), with hands-on project experience building and deploying AI-driven applications. Seeking a Software Developer role to design, develop, and optimize scalable software solutions that deliver measurable business value.

EDUCATION

B.Tech, Computer Science and Engineering

Expected Graduation: 2027

Rajiv Gandhi College of Engineering and Technology, Puducherry | CGPA: 8.45

Higher Secondary, Achariya Siksha Mandir

2023

Puducherry | Percentage: 80.83

SSLC, Amalorpavam Higher Secondary School

2021

Puducherry

TECHNICAL SKILLS

- Programming Languages: Java, Python, C, C++
- Web Technologies: HTML, CSS, JavaScript, REST APIs, JSON, API Integration
- Databases: MySQL, MongoDB, Oracle, SQL Queries, DBMS, JDBC
- Frameworks & Tools: Flask, Spring Boot, Maven, Scikit-learn, Pandas, Git, GitHub, VS Code
- Core Concepts: Object-Oriented Programming, Data Structures and Algorithms, Machine Learning, Software Development Life Cycle (SDLC), Agile Methodology, Debugging, Problem Solving

PROJECTS

AI Healthcare Chatbot with Voice Recognition

Technologies: Python, Flask, Scikit-learn, Pandas, SpeechRecognition, HTML, CSS, JavaScript

- Developed and deployed an AI healthcare chatbot with voice recognition using Flask, Scikit-learn, HTML, CSS, and JavaScript, supporting symptom-based health queries through a responsive web interface.
- Designed a REST API layer in Flask to connect the trained Scikit-learn model with the frontend, enabling real-time symptom-based predictions.
- Integrated SpeechRecognition and the Web Speech API to enable voice-based symptom input and hands-free chatbot interaction.
- Tested the application across 20+ symptom scenarios to verify symptom prediction, voice input, and chatbot response workflows.

GitHub: github.com/akashjayaprakasan/healthcare_chatbot_with_voice_recognition

Open Source Developer Analytics & Portfolio Generator

Technologies: Python, FastAPI, React, GitHub REST API, MongoDB Atlas, Render, Vercel

- Developed and deployed a full-stack GitHub analytics platform using React, FastAPI, MongoDB Atlas, GitHub REST API, Render, and Vercel.
- Analyzed 10+ GitHub repositories using the GitHub API to retrieve commit history, repository metadata, and language statistics.
- Built 9 dashboard modules — GitHub Profile Overview, Developer Score, Repository Analytics, Language Insights, Project Recommendations, Recent Activity, Contribution Streak Tracker, Saved Developer Profiles, and Portfolio Generator with PDF Export.

CERTIFICATIONS

- Python for Data Science and Cloud Computing — NPTEL
- Basics of Python — Certification Program
- DELF A1, A2 (Diplome d'etudes en Langue Francaise) — French Language Proficiency

ACHIEVEMENTS / EXTRA-CURRICULAR ACTIVITIES

- Vice President, LITWIT Literature Club — led event planning and coordinated literary competitions for 100+ participants
- Vice President, COMFIESTA Technical Symposium — organized 5 technical events and coordinated 150+ participants through cross-team planning and event execution.
- Attended workshops on Big Data, Cloud Computing, and Artificial Intelligence at Rajiv Gandhi College of Engineering and Technology
- Participated in a Personality Development webinar focused on professional communication and self-development
